PRESS RELEASE

Maruti Suzuki sets up Water ATM in Naviyani village, Gujarat

- *5th Water ATM under community development initiative*
 - *Clean drinking water at 35 paisa/litre only*
- *Water meets WHO standards and retains essential minerals*

New Delhi / Ahmedabad, 14th June 2019: Maruti Suzuki India Limited (MSIL), inaugurated its 5th Water ATM facility in Gujarat. Set up in Naviyani village in Surendra Nagar district, the Water ATM will benefit over 2800 community members. Fresh, clean water will be available at a nominal rate of 35 paisa per litre.

Built on a self-sustaining model the facility has a capacity to generate over 1000 litres of water per hour. For 100% adherence of quality standards, the Water ATM is fitted with a Water Quality display screen. The Water Quality display screen shows the purity of water in terms of TDS (Total Dissolved Solids), temperature and ph level for the users.

Dedicating the facility to the village community, **Mr A K Tomer, Executive Advisor, Corporate Social Responsibility, Maruti Suzuki India Limited, said,** *“Access to drinking water was identified as a major issue in Maruti Suzuki adopted villages. In Naviyani Village, the TDS levels of bore-well water was as high as 2000, making it unsafe for human consumption. The 10-stage UV filtration process used in the Water ATM has now brought down the levels by around 90%, which is within the permissible range.”*

He added, “It is a very rewarding experience to see people benefit from our CSR initiatives. Our endeavor is to transform the adopted villages through interventions in areas of water and sanitation, health, education and creation of common community assets.”

He also thanked the Panchyat members, village community and the partner agencies for their support in setting up this facility.

Maruti Suzuki has partnered with Waterlife India, to set up this Water ATM. The Company has invested the initial project cost of over Rs 20 lakhs, while the village panchayat provides land, water and electricity. Waterlife India will continue to manage operations and maintain the Water ATM for next ten years. The facility will be owned by the village panchayat.

As part of its Community Development initiative, Maruti Suzuki started Community Safe Drinking Water project in July 2016. Through the initiative Maruti Suzuki supports UN’s Sustainable Development Goal 6 of ensuring access to clean water and sanitation for all. The Company has established 21 Water ATMs across 20 of its adopted villages in Haryana and Gujarat, benefiting over 10,000 households.

About Maruti Suzuki’s village development plan

Community Development is one of the three pillars of Maruti Suzuki India Limited’s Corporate Social Responsibility initiatives– the other two being road safety and skill development.

With an objective to bring about overall improvement in the quality of life of community members residing around its manufacturing facilities, Maruti Suzuki has adopted 26 villages in Gujarat and Haryana. Ensuring direct supervision and implementation, Maruti Suzuki's interventions under community development, are results-oriented and concentrated in the areas of providing clean water, improved sanitation facilities, improved educational infrastructure and development of common community assets.

Expanding its community development initiatives, Maruti Suzuki has recently laid the foundation stone for a 100-bed Hospital and a School in Sitapur, Gujarat. Both these projects will benefit over 3 lakh people residing in and around Sitapur village. The Company has announced an investment of INR 125 crores for both these projects.
