## Media Release

**Maruti Suzuki India Limited Expands Green Cars Portfolio to NEXA***A new dimension of sustainability by NEXA – Introducing Baleno S-CNG and XL6 S-CNG*

**MARUTI SUZUKI** NEXA

## INTRODUCING S-CNG IN NEXA

NEXA introduces S-CNG\* in our most premium range of cars, for those who care about making a positive change for the environment. Our S-CNG vehicles have saved over 1 million tonnes of CO<sub>2</sub> emissions till date.

**S-CNG**  
DRIVE SMART. CHOOSE GREEN.

**XL6** **BALENO**

**1 MILLION TONNES CO<sub>2</sub> EMISSIONS SAVED**

CREATE. INSPIRE.

\*Available in select variants only.

**New Delhi, 31<sup>st</sup> October 2022:** Strengthening its commitment towards environment-friendly mobility solutions, Maruti Suzuki India Limited (MSIL) has been offering a gamut of green powertrain options for its customers to choose from. This “technology agnostic” approach to achieve democratization of green mobility has received an overwhelming response from customers. The recently launched Intelligent Electric Hybrid in the Grand Vitara has witnessed strong demand, while the Smart Hybrid and S-CNG technologies in the MSIL portfolio have already proven their mettle with more than 2 million cumulative sales.

Now, Maruti Suzuki has further upped the ante with the expansion of the S-CNG<sup>^</sup> technology in NEXA. Two blockbuster premium products of NEXA, the New Age Baleno and the All-New XL6 will now feature the S-CNG system providing the aspirational customer with feature rich and class leading products with minimal impact on the environment.

Announcing the introduction of S-CNG at NEXA, **Mr. Shashank Srivastava, Senior Executive Officer, Marketing & Sales, Maruti Suzuki India Limited, said** “Maruti Suzuki is committed to democratize green mobility solutions in India, and we believe offering a large bouquet of technologies to suit varied customer needs is the only approach to achieve mass adoption of environment friendly vehicles. CNG is one such technology known for emitting considerably lower CO<sub>2</sub> emissions compared to conventional fuels; with its debut in NEXA | along with Smart Hybrid and Intelligent Electric Hybrid offerings, NEXA will provide an array of eco-friendly mobility solution options for our evolved eco-conscious customers. Through market studies, we have learnt that the premium segment customer is actively looking for eco-friendly options without compromising on performance, technology, safety and driving experience. Baleno S-CNG and XL6 S-CNG have been developed keeping these uncompromising

NEXA customers in mind. Baleno S-CNG will be the country's one of the most powerful premium CNG hatchbacks, while XL6 S-CNG will be a premium CNG MPV."

He further added, "Maruti Suzuki's success in democratizing the CNG technology has resulted in sales of more than 1 million S-CNG vehicles which has saved CO<sub>2</sub> emissions of approximately 1 million tonnes. Such figures embolden our confidence of having large scale positive impact on the environment through offering a range of green technologies for customers to choose from."

### MSIL S-CNG Technology

MSIL S-CNG vehicles are conceptualized, designed, developed, and rigorously tested at MSIL's world-class Research & Development facility before they are made available to customers. MSIL S-CNG vehicles deliver safety, performance, durability, and high fuel efficiency. The S-CNG vehicles come with dual inter-dependent Electronic Control Units (ECU) and an Intelligent Injection System to provide an air-fuel ratio that ensures superior performance and fuel efficiency. The S-CNG system offers enhanced safety\*\* with stainless steel pipes and joints to avoid corrosion and leakage in the entire CNG structure. Integrated Wire Harnesses are used to eliminate short-circuiting and a Microswitch ensures the vehicle does not start during CNG fuel filling process.
